DETAILED ACTION

1. Applicant's election without traverse of Group I (claims 1-8) in the reply filed on 3/9/07 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3 and 7, the phrase "*can*" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are in fact performed by the invention, and are part of the invention or if such recitation "*can*" is just a possible result that may or may not happen. Appropriate correction is required (i.e., replace "said drive member can selectively operate to move" by --said drive member selectively operates to move--).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Edwards et al. (US 6,086,340).

Edwards (particularly figure 2) teaches a pump comprising: a pump chamber 26, a fluid inlet, a fluid outlet, a valve assembly 25 located between said fluid inlet and said pump chamber, a valve assembly 27 located between said fluid outlet and said pump chamber, a plunger 48 carrying a diaphragm 18 and a drive member for reciprocating the plunger for drawing fluid through said inlet and expelling it through said outlet.

6. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown (US 4,636,149).

Brown (particularly figures 3-5) teaches a pump comprising: a pump chamber 24, a fluid inlet, a fluid outlet, a valve assembly 32 located between said fluid inlet and said pump chamber, a valve assembly 36 located between said fluid outlet and said pump chamber, a plunger 58 carrying a diaphragm 40 and a drive member 64 for reciprocating the plunger for drawing fluid through said inlet and expelling it through said outlet, wherein said drive member moves said plunger so as to close communication between said pump chamber and said fluid outlet (see figure 5).

7. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by McNaull et al. (US 6,758,657).

McNaull (particularly figure 1) teaches a pump comprising: a pump chamber 17, a fluid inlet 19, a fluid outlet 20, a valve assembly 21 located between said fluid inlet and said pump

chamber, a valve assembly 21 located between said fluid outlet and said pump chamber, a plunger 28 carrying a diaphragm 31 and a linear drive member 27 for reciprocating the plunger for drawing fluid through said inlet and expelling it through said outlet.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Allowable Subject Matter

8. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
